

What is AX PRO?

AX PRO is a new generation wireless alarm system which supports 2 independent wireless communication channels. This ensures there is no interference across channels and allows superfast transmission of alarm messages and videos simultaneously. The AX PRO provides an ideal intrusion protection solution, especially for residential areas, retail and SMBs. With its minimalist design and superior detector compatibility, it is able to connect a variety of security peripherals to enhance safety. Examples include motion detector (with built-in camera), magnetic contact, smoke sensor, water leak detector, and much more.

Tri-X Wireless Technology

Advanced peripherals wireless processor features long RF transmission range to cover home, shop, and office requirements.

CAM-X Wireless Technology

Advanced PIRCAM wireless processor makes it quick and efficient to ensure snapshots are delivered promptly to users and ARC. Supports up to 800m transmission distance for PIRCAM.

AX PRO

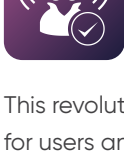

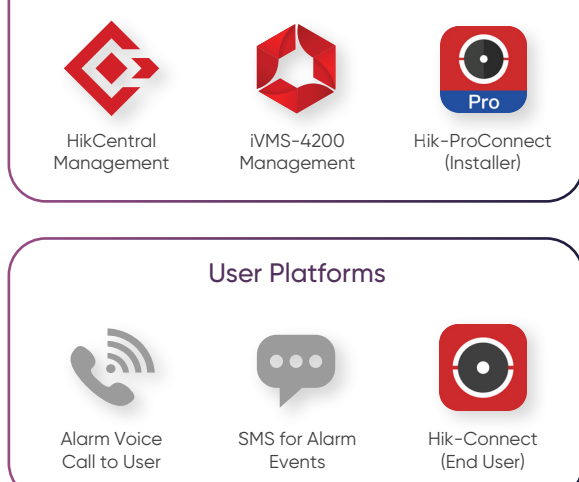

Rethink what you can get from your wireless security system

Features Summary

Multiple Management & Control Methods

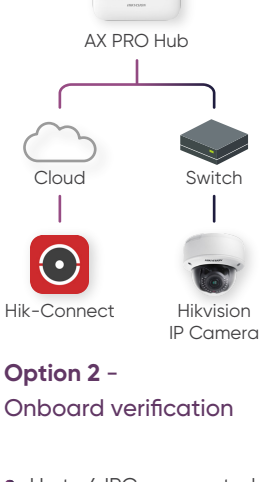

IVaaS - Intruder Verification as a Service

This revolutionary service provides video verification for users and/or monitoring stations to quickly and efficiently confirm events on the system. The video report covers 5 seconds prior to the activation and 2 seconds after the activation (or vice versa).

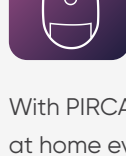

Option 1 - Live HD Video via Hik-Connect

- Live Video to check when alarm is triggered
- Up to 96 online Hikvision IP Cameras in Hik-Connect can be linked.

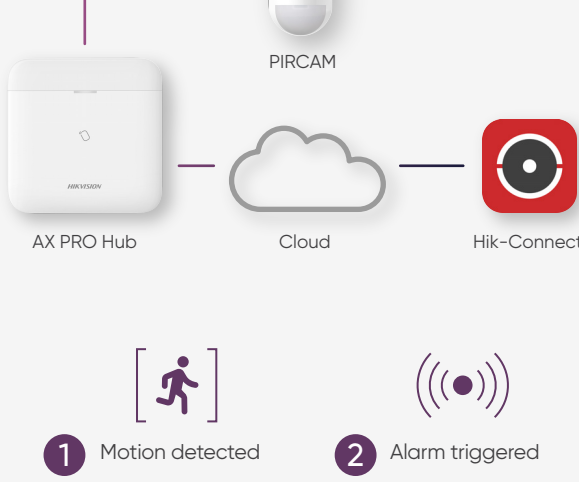

Option 2 - Onboard verification

- Up to 4 IPCs connected directly with panel
- 7 second video delivered to email or Hik-Connect (5s pre-alarm + 2s post-alarm, or vice versa).

PIRCAM - PIR Detector with camera to verify alarms

With PIRCAM, you'll know about the actual situation at home even before the burglars understand that they're busted. An animated series of photos follows the instant motion alarm for an accurate situation appraisal.

- 1 Motion detected
- 2 Alarm triggered
- 3 Motion captured
- 4 Pushed to App

AX PRO

A comprehensive alarm system for small and medium-sized scenarios

AX PRO Hub (M)

- Long RF Range
- 32 Areas
- 210 Peripherals
- 5000 Logs

- RF frequency
- IP module
- Wi-Fi module
- GPRS/3/4G module
- Alarm voice call to end-users
- SIA/CID protocol

- IPC and PIRCAM supported
- Dual SIM card design
- Tri-X wireless technology
- SMS for alarm events
- Hik-ProConnect / Hik-Connect

PIRCAM

- Photo Resolutions: 160x120, 360x240, 640x480
- Photo transmission time: 5s, 6s, or 12s (corresponding to photo resolution)
- Capture photos manually via app

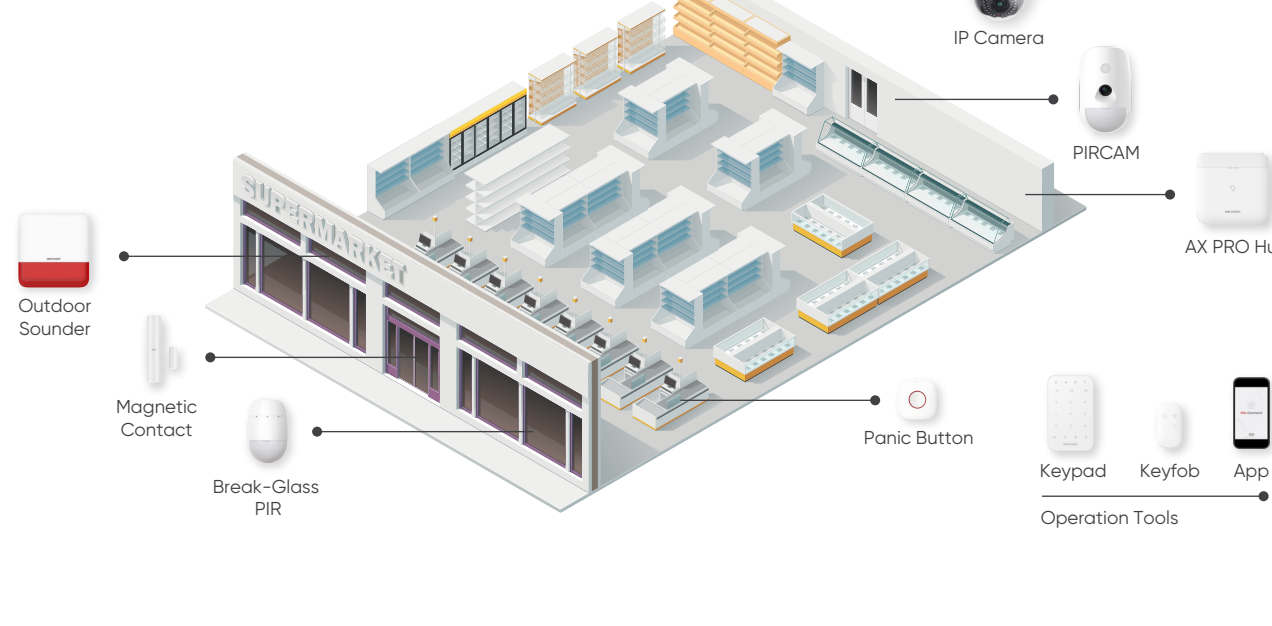

- CAM-X wireless technology
- IFT technology
- Digital temperature compensation
- Up to 800 m transmission distance
- 12 m detection range
- Up to 30 kg pet immunity

- Up to 20 photos compiled into a GIF
- Up to 6 years battery life
